Selecting which providers will have access to create clinical notes

Once you have activated your Clinical Notes, you will be sent to the '**Settings - Clinical Notes**' screen to select which providers will have access to create/edit clinical notes.

You are able to edit these settings at any time by returning to the Add-Ons store and clicking the '**Settings**' button on the Clinical Notes tile.

Your selected package determines the number of providers that can have access to Clinical Notes.

Settings - Clinical Notes

The Single (1 Provider) package is currently selected for this practice.

Package	Price (per month)
